PRIORITY APPLN. INFO.: US 1995-442227 19950515

AB Disclosed is a migration imaging member comprising (a) a substrate, (b) a softenable layer comprising a softenable material and a photosensitive migration marking material, and (c) a transparentizing agent which transparentizes the migration marking material in contact therewith contained in at least one layer of the migration imaging member. Also disclosed is a process which comprises (1) providing a migration imaging member comprising (a) a substrate, (b) a softenable layer comprising a softenable material and a photosensitive migration marking material, and (c) a transparentizing agent which transparentizes the migration marking material in contact therewith contained in at least one layer of the migration imaging member, (2) uniformly charging the imaging member, (3) exposing the charged imaging member to an activating radiation at a wavelength to which the migration marking material is sensitive, and (4) causing the softenable material to soften and enabling a first portion of the migration marking material to migrate through the softenable material toward the substrate in an imagewise pattern while a second portion of the migration marking material remains substantially unmigrated within the softenable layer, wherein subsequent to migration of the first portion of migration marking material, either (a) the first portion of migration marking material contacts the transparentizing agent and the second portion of migration marking material does not contact the transparentizing agent or (b) the second portion of migration marking material contacts the transparentizing agent and the first portion of migration marking material does not contact the transparentizing agent.

AB Title compds. [I; a, b = single bonds, R2 = H; or a = single bond, b = double bond, and R2 = null; R1 = H, aryl, alkyl, aralkyl; R3 = H, Me, Et, OH, NH2, SMe; n = 0-10; X = O, S; R4 = (substituted) alkyl, aryl, heterocycllyl, cycloalkyl, amino, OH, etc.] were prepared as inhibitors of 5 $\alpha$ -reductase and isoenzymes thereof. The compds. are useful for the treatment of hyperandrogenic disease conditions and diseases of the skin and scalp (no data). Thus, 20-hydroxy-4-methyl-5 $\alpha$ -4-azapregnan-3-one, 11-ethylthioundecanoic acid, DMAP, and DCC were stirred in CH<sub>2</sub>Cl<sub>2</sub> at room temperature to give 20-[11-(ethylthio)undecanoyloxy]-4-methyl-5 $\alpha$ -4-azapregnan-3-one.

AB The title compds. [I; R1 = (substituted) 5- or 6-membered N heterocyclyl; X = alkylene, alkylidene; R2 = H, (substituted) alkyl, alkenyl, alkynyl, etc.; A, B, D = substituted C or hetero atom, single bond; E = CO, CS; Q = H, (substituted) alkyl, alkenyl, alkynyl, etc.] are prepared Refluxing a mixture of 1,3-cyclohexanedione, 2-chloro-5-pyridylmethylamine, and toxic acid hydrate in MePh gave quant. II, which killed 100% aphids and green rice leaf hoppers at 125 ppm. Also prepared and tested were 82 addnl. I.

Left truncation is not valid in the specified search field in the  
specified file. The term has been searched without left truncation.  
Examples: '?TERPEN?' would be searched as 'TERPEN?' and '?FLAVONOID'  
would be searched as 'FLAVONOID.'

If you are searching in a field that uses implied proximity, and you  
used a truncation symbol after a punctuation mark, the system may  
interpret the truncation symbol as being at the beginning of a term.  
Implied proximity is used in search fields indexed as single words,  
for example, the Basic Index.
